

## FUNDAMENTALS TABLE SPECIFICATION SHEET

**TOP:** Top is constructed of 1 ¼" thick, M3 commercial grade wood core (45#-48# density) bonded with high-pressure laminate and equal strength backing sheets. Top is provided with standard 3mm PVC edging. Optional T-Edge and self-edge are available.

**LEGS:** T-Leg and C-Leg configurations are available. Legs are all-welded. Each leg includes (2) 1"x2" rectangular tubing uprights (16 gauge tubing) wrapped in a 6-5/8" steel encasement. Tubing is welded to the leg foot, also 1"x2" tubing, and welded to a 12 ga. 6" x 12-1/2" top mounting plate that attaches to the underside of the table top. Legs are finished as detailed below. Four adjustable floor glides are standard.

Connecting the legs is a steel leg spanner with integral wire management channel. The leg spanner is constructed of 20 ga. cold-rolled steel, multi-formed for additional strength and rigidity. The spanner is attached to both legs, and to the underside of the table top. In addition to supporting wire management, the leg spanner helps to prevent table sagging.

**OPTIONS:** Table is available in a mobile version. A short modesty panel (with or without perforations) is optional. Grommets are available as an option. See Table EZ Order form for 2 standard grommet locations, or consult with the factory regarding number and placement of grommets.

**Finish:** All Invincible<sup>™</sup> steel products are processed through a 5-stage industrial washer to remove oil and organics from the surface while applying an iron phosphate conversion coating to promote adhesion and corrosion resistance as a pre-paint treatment. In addition, parts are rinsed with a non-chrome sealer to aid in paint adhesion and to further protect the metal. **The surface is then painted with environmentally-friendly and highly durable hybrid powder coat paint applied electrostatically and cured at high temperature.** Invincible<sup>™</sup> products are available in a full assortment of standard Invincible<sup>™</sup> colors, both smooth and textured finishes, as well as special order colors.
