

MAXUM

LABORATORY FURNITURE - TABLE FRAMES

MAXUM

Tables Frames Built to Last

Invincible Furniture Solutions standard Maxum product line offers a variety of table frames providing flexibility for easy access; a home for equipment and options for mobility. Our large offering of sitting and standing height table frames with fixed or adjustable legs in a multitude of widths and depths gives the user flexibility for large equipment pieces. By adding casters, those items needed throughout multiple workstations or labs can be transported with ease.

Invincible standard table frame features two welded end leg assemblies (leg and stretcher bar). The welded end leg assemblies are bolted in the field to the two side rails.

Table frames ship knocked down. Table tops ordered separately.

OPTIONS

- Stretcher rails
- Data and electrical raceways
- Leg shoes
- Tackboard
- Side and back modesty panels
- Countertop
- Shelves

Caster Options

Invincible's Maxum Table Frame legs are designed to accept casters as shown. Should another caster be specified, a review of the caster and table leg will occur to insure the fit.

When requesting casters please note your preference; all locking or two locking and two non-locking.

MAXUM

Heavy Duty/Lab/STEM Tables

Maxum is one of the best heavy duty tables in the industry! When configured properly, Maxum can hold up to 1500 pounds fixed or up to 600 pounds mobile! Maxum is available as fixed or adjustable height with additional options of shelves, drawers, data and electrical raceways and side and back modesty panels. Available with ANY Wilsonart and Formica high-pressure laminate, and with smooth and textured paint finishes. Lab and STEM configurations available with Chem Surf, phenolic, and resin tops. Limited Lifetime warranty! Maxum... one TOUGH table!

Invincible's quality steel table frames are fabricated in Manitowoc, Wisconsin with American labor. Approximately 94% of our component parts (including our steel) are manufactured in the USA.

POWDER COAT PAINT COLOR

All Invincible™ paint colors are powder coat paints. They are applied electrostatically, then cured under high heat to allow paint to flow and form a "skin". This process creates a hard finish that is tougher than other paints and finishes. In addition to being very durable, powder coat paints are environmentally friendly.

See Paint & Edge Brochure for specific information on what colors are available.
